Presenting *X and the City:* *Modeling Aspects of Urban Life*

By John A. Adam, Ph.D.

“Adam is the author of *A Mathematical Nature Walk* and *Mathematics in Nature*, and coauthor of *Guesstimation: Solving the World’s Problems on the Back of a Cocktail Napkin*. Filled with interesting and unusual observations about how cities work, *X and the City* shows how mathematics undergirds and plays an important part in the metropolitan landscape.”

~ Princeton University Press

Thursday, February 28, 2013

12:30-1:30pm
