INSTRUCTIONAL DESIGN & TECHNOLOGY

MASTERS OF SCIENCE (MS. ED.)

The Instructional Design and Technology Program at Old Dominion University's Darden College of Education provides graduate students with a foundation in instructional design, cognitive theory, and research. The program offers degrees to students who attend classes either on our main campus in Norfolk, VA or via a unique distance learning option available to students who reside elsewhere. Our graduates go on to work in business, healthcare, military, higher education, K-12, and non-profit industries.

Come learn more about instructional design and our masters program at one of our information sessions:

Date	Time	Location
