

REYES

Remote Experience for Young Engineers and Scientists

Join us virtually: June 22 – August 13, 2020

This summer join us virtually at Old Dominion University (ODU) for an engaging 8-week STEM-based summer enrichment program that is free and open to the public. People of all ages are welcome!

Faculty at ODU and researchers at NASA, Thomas Jefferson National Accelerator Facility (Jefferson Lab) and CERN will cover a range of topics--astronomy, artificial intelligence, solving crimes through entomology, engineering, coronavirus simulation with gaming technologies, psychology, Python coding and more. You have the option to sign up to attend one lecture or the entire summer program.

Complete your free registration today at: odu.edu/REYES
