

# COLLEGE OF HEALTH SCIENCES

## SCHOOL OF REHABILITATION SCIENCES

### NAMING OPPORTUNITIES

The new three-story 126,000 square foot Health Sciences building will be located at Monarch Way and 41st Street. The state-of-the-art building will house the future Faschini Wallach Center for Restorative Therapies and our clinical space will expand from 2,000 square feet to 11,000 square feet. The clinic will include a large therapy gym, a pediatric treatment area, a community re-integration room, an activities of daily living apartment, 11 treatment rooms and a therapeutic garden.

In our space we will provide physical, occupational and speech therapy services for children and adults with a wide variety of orthopedic and neurologic conditions. Advanced assessment and rehabilitation services will include robotics, body weight support systems, virtual reality, and telehealth. This site will also provide clinical education for students and support clinical research that will foster interprofessional collaboration among faculty, clinicians and students.

### Leaving Your Legacy Inside the Building

Naming opportunities in our new Health Sciences building will enhance the educational value of the university and enable you to have an enduring place in the building.

Imagine seeing your name or a loved one's name on one of our therapy treatment rooms. Each room is 120 square feet and will have a treatment bed and related equipment. We are excited to share that for a gift of \$15,000 you can name one of the treatment rooms in our new building. To make your gift today, please visit [give2odu.com/troom](http://give2odu.com/troom)
