BYLAWS
OF THE OLD DOMINION UNIVERSITY
BOARD OF VISITORS

PREFACE

The Board of Visitors adopts the bylaws that follow for the orderly and efficient conduct of its meetings and the business of Old Dominion University. This preface is to provide a brief overview of the source of the Board’s authority as a public institution of higher education, and a component of the executive branch of the government of Virginia.

The Virginia statutes specific, or organic to the University, Va. Code §§23.1-2000 through 23.1-2004, might be thought of as the University’s charter. These statutes constitute the Board of Visitors as a public corporation named “Old Dominion University,” and set the corporation’s basic purpose and authority. Other statutes apply to all Commonwealth institutions of higher education to impose other duties and confer additional powers. The University is also subject, along with all agencies of the executive branch of the state government, to such statutes as, for example, the Virginia Freedom of Information Act which governs, *inter alia*, the circumstances under which a public body, such as this Board, may meet in closed session. Ultimately, however, the University’s operations are dependent on the terms of the Appropriations Act adopted bi-annually in the even numbered years by the Virginia legislature, the General Assembly, and amended in the odd numbered years. Finally, it is to be noted that the Commonwealth’s agencies and institutions are not as a rule subject to the general statutes of Virginia, as well as the ordinances enacted by the local governments, unless the General Assembly expressly provides otherwise.

Members of the Board, the University staff, and the public should be aware at all times that the authority conferred on the Board of Visitors by the General Assembly resides solely in the Board. That is, no visitor or other individual, regardless of title or position, shall speak for or exercise the Board’s authority except to the extent that the Board may so provide by delegation contained in these bylaws, or by other action of the Board.

The Commonwealth demands institutional direction by a Board composed of active, informed, and engaged visitors. As a measure of this need, the General Assembly provided that if any member of the Board should fail to perform the duties of a visitor for a year, without sufficient cause, the Board shall certify the same to the Governor; and the office of that member shall then be vacant.

ARTICLE I
Power, Authority, and Duties

§ 1.01. Role and Responsibilities. As the body responsible for the University, the Board of Visitors’ focus shall be on student success, academic freedom, serving the public purposes of higher education, preserving and protecting institutional autonomy to the extent permissible under the Code of Virginia. The Board’s trust includes the following responsibilities:

(a) Presidential Selection and Oversight. The Board’s most important responsibility is selection (Article V of these Bylaws) and oversight (§7.01(f) of these Bylaws) of
the University President. The President reports only to the Board and it is the responsibility of the Board to ensure that the President is implementing the Board’s formally adopted policies and efficiently and effectively accomplishing the University’s goals.

(b) University Mission. The Board is responsible for ensuring that the University’s mission reflects and directs the relative commitment to undergraduate, graduate, and professional programs, as well as an appropriate balance among instruction, research, and service. The University’s Mission shall be reviewed every five years in conjunction with the development of the Strategic Plan, or more frequently if a significant activity or event necessitates further consideration.

(c) Strategic Planning. The Board is responsible for ensuring there is an ongoing strategic planning process that results in the Board approving a Strategic Plan at least every five years. The President is responsible for leading the strategic planning process and overseeing its implementation. In conjunction with the President, and in consultation with the faculty, other internal groups, and external constituencies, the Board shall take an active part in developing priorities and goals essential to the accomplishment of the University’s mission, allocation of resources, and measurement of success.

(d) University Budget and Financial Statements. The Board is responsible for ensuring that the University’s mission, priorities, and goals are visible in and expressed through its budget. The budget shall reflect the priorities developed in the strategic planning process. The Board shall work in conjunction with the President and his/her administration to receive budget related information in a meeting prior to approving the University’s annual budget. The Board is responsible for oversight in submitting the annual financial statements to the Auditor of Public Accounts (Va. Code §23.1-1303 B.10), and reporting to SCHEV (the “Council”) the required financial information contained in Va. Code §23.1-1303 B.11 by December 1 of each year.

(e) Academic Integrity. The Board is responsible for advancing and protecting the academic quality of the education offered by the University including, but not limited to, considering strategic planning, admission standards, graduation requirements, grading policies, use of technology in the classroom, and faculty structure, development, productivity, priorities, and incentives for outstanding teaching.

(f) Research Integrity. The Board is responsible for promoting and preserving excellence in basic and applied research. In accordance with Va. Code §23.1-1303 B.9 this also includes adopting regulations related to research involving human subjects along with submission of an annual report to the Governor, General Assembly, and University President if conducted.

(g) Student Success. The Board has a vested interest in student success and considers an array of factors related to student access. The Board is responsible for assuring the high quality of student life necessary to ensure that higher education achievement can take place in an environment conducive to a high level of learning, including the release of student records (Va. Code §23.1-1303 B.5) and posting a list of required textbooks (Va. Code §23.1-1308 B).

(h) Affiliated Foundations. The Board is responsible for assuring that priorities for fund raising, research, athletics, real estate acquisition and disposal, and other affiliated foundation activities are consistent with the University’s mission, priorities, and goals. While the Board recognizes the independent governance of these private activities, the Board is responsible
for private resources contributed to the University for public purpose. Guidelines for the exercise of this responsibility are contained in the Board Policies and Procedures Manual and affiliation agreements.

(i) Audit Planning and Review. The Board is responsible for the selection of accountability measures, review of results, and determination of how effectively its policies have been implemented through the audit process, i.e., whether the University’s allocation of resources is consistent with the Board’s priorities and with the University’s financial position.

(j) Fiscal Efficiency and Integrity. In its review and approval of the University’s annual operating budget and the setting of tuition and fees, the Board is ultimately responsible for assuring fiscal efficiency and integrity; including preserving and protecting University assets.

(k) University Advancement. The Board is responsible for promoting the academic purpose, strategic initiatives, service, and solvency of the University among its many constituents by communicating the institutions accomplishments, sharing its vision for the future, relating the community to the campus and the campus to the community, maintaining constituent trust, and engaging the larger local, national and international community in partnerships to achieve University goals and objectives.

(l) Admissions. The Board is responsible for establishing regulations or institution policies for the acceptance and assistance of students (Va. Code §23.1-1303 B.2) and agreements with each associate-degree-granting public institution of higher education (Va. Code §§23.1-907 and 23.1-306).

(m) Financial Aid. The Board is responsible for assisting the Council in enforcing provisions related to eligibility for financial aid (Va. Code §23.1-1303 B.3).

(n) Additional Responsibilities. The Code of Virginia also requires the Board to submit to the General Assembly and the Governor an annual executive summary of its activities (Va. Code §23.1-1303 B.12), provide to the Council annual data related to expenditures (Va. Code §23.1-209), and make available to any interested party upon request the most recent report of the Uniform Crime Reporting Section of the Department of State Police pertaining to institutions of higher education (Va. Code §23.1-1303 B.13).

IMPLEMENTATION OF STANDARDS FOR THE SAFE USE OF ARTIFICIAL INTELLIGENCE ACROSS THE COMMONWEALTH

By virtue of the authority vested in me as Governor, I hereby issue this Executive Order to promulgate important safety standards to ensure the responsible, ethical, and transparent use of artificial intelligence technology by state government in order to protect the rights of Virginians, to provide best-in-class state government services, and to ensure that our students are well prepared for this technology.

Importance of the Initiative

Artificial Intelligence (AI) products are already deployed across a number of state government agencies. As the availability of AI products continue to increase, it is vital that we recognize both the usefulness of the technology and the necessity to place guardrails on its use in order to protect Virginians against potential misuse. AI technology has the capability to enhance the delivery of essential services to all Virginians, but the integration of this tool into the life of Virginians must be done through a continuously discerning and responsive approach that guarantees the protection of the privacy, security, and confidentiality of all Virginians’ personally identifiable information.

It is important to implement both policy and information technology standards that safeguard the state’s business applications while simultaneously protecting the individual data of all Virginians. We can take full advantage of the benefits of AI, but we must also mitigate the risks with this evolving technology.

AI’s application in the educational ecosystem cannot be a substitute for teacher-facilitated instruction and learning experiences; however, it can be an important tool to transform, support, and complement tailored and effective educational experiences. Virginia’s colleges and universities lead the nation in technology research and development, and the most critical national security and military intelligence institutions in the United States are headquartered in Virginia. These unique factors provide Virginia with a responsibility to spearhead a policy environment that builds trust, safety, and security in the development and
deployment of AI technologies as well as the opportunity to assemble experts in the field to provide ongoing advice and assistance in the employment of AI products.

**Preamble**

In order to implement the guardrails for the use of AI technologies across state government, I am directing the Virginia Information Technologies Agency (VITA) to publish the AI Policy Standards and AI Information Technology Standards and to make them available to all Executive Branch Agencies and the general public. I direct all Executive Branch Agencies to follow the approval processes and procedures as defined in those standards. I direct the Department of Education and State Council of Higher Education for Virginia, in consultation with the Virginia Community College System, to develop and issue the tools, instructional resources, and support as needed under the Education Guidelines to provide the necessary assistance around the considerations, implementation, and use of AI at all levels of education. Furthermore, the Secretary of Public Safety and Homeland Security, in conjunction with the Office of the Attorney General, is directed to develop standards for the appropriate use of AI applicable to all Executive Branch law enforcement agencies and enforcement personnel.

**Directive**

Accordingly, pursuant to the authority vested in me as the Chief Executive Officer of the Commonwealth, and pursuant to Article V of the Constitution of Virginia and the laws of the Commonwealth, I hereby direct all relevant Secretariats to take the following actions:

I. **Policy Standards**

The AI Policy Standards enacted under this Executive Order set out guiding principles for the ethical use of AI, general parameters to determine the business case for AI, a mandatory approval process for all AI capabilities, a set of mandatory disclaimers to accompany any products or outcomes generated by AI, methods to mitigate third-party risks, and measures to ensure that the data of private citizens are protected. VITA shall publish these policy standards and all Executive Branch Agencies shall follow them. **AI Policy Standards**

II. **Information Technology Standards**

The AI Information Technology standards enacted under this Executive Order provide the protocols and requirements for Commonwealth agencies and suppliers to follow if they employ AI products or technologies. These standards apply to both existing and new uses of AI; stand-alone AI embedded in commercial or government systems or applications, and generative AI within other systems or applications; AI developed either by the agency or by third parties on behalf of agencies for the fulfillment of specific agency missions, including relevant data inputs used to train AI and outputs used in support of decision making; and agencies’ procurement of AI applications. VITA shall publish these technology standards and all Executive Branch Agencies shall follow them. **AI IT Standards**
III.  Education Guidelines

The AI Education Guidelines enacted under this Executive Order recognize the dual nature—both the opportunities and risks—of this developing technology in education. K-12 schools and postsecondary institutions must embrace innovation, experimentation, and new educational opportunities for students as well as ensure appropriate guardrails and necessary constraints exist to safeguard individual data privacy and mitigate discriminatory outcomes. Governing boards and system leaders at every education level require flexibility to offer different pathways for their institutions and schools based on their readiness and willingness to integrate this technology, while also prioritizing training for students, educators, and faculty to ensure the responsible and ethical use of AI technology. The Guidelines are also meant to support education institutions to foster learning environments that prepare all students with the knowledge, competencies, and skills for successful careers that utilize AI technology.

The AI Education Guidelines applies to both K-12 and postsecondary institutions.

IV.  Law Enforcement Considerations

Within nine months of the effective date of this Executive Order the Secretary of Public Safety and Homeland Security in conjunction with the Office of the Attorney General shall develop standards for the employment of AI technologies applicable to all executive branch law enforcement agencies and personnel. In addition, the Secretary of Public Safety and Homeland Security shall provide model standards upon request to local law enforcement jurisdictions to assist them in the use of AI for law enforcement purposes.

The Secretary of Public Safety and Homeland Security, in conjunction with the Secretary of Health and Human Resources, shall examine whether sufficient safeguards currently exist to protect children from online predators using AI technology.

V.  Establishment of an Artificial Intelligence Task Force

The Director of the Office of Regulatory Management in conjunction with the Secretary of Administration, shall convene an Artificial Intelligence Task Force to provide ongoing recommendations on the implementation of the above standards and Education Guidelines as well as provide recommendations on the implementation of any AI pilots conducted by executive branch agencies. These recommendations shall be provided by the task force on a biannual basis.

VI.  Definition

For purposes of this Executive Order the term “Executive Branch Agency,” means any agency, institution, department, board, bureau, commission, council, public institution of higher education, or other instrumentality of state government in the Executive Department as listed in the Appropriations Act.
Effective Date of the Executive Order

This Executive Order shall be effective upon signing and shall remain in full force and effect unless amended or rescinded by further executive order or directive. Given under my hand and under the Seal of the Commonwealth of Virginia this 18th day of January 2024.

GUIDELINES FOR AI INTEGRATION THROUGHOUT EDUCATION IN THE COMMONWEALTH OF VIRGINIA

Artificial intelligence (AI) brings tremendous potential to transform education at all levels. By enabling more efficient, universal, and deeper learning, AI can unlock new realms of knowledge that were previously unimaginable. This emerging technology promises to catalyze business innovation and economic growth for the Commonwealth.

However, AI also poses risks that must be carefully managed. As we integrate these powerful tools into our schools and workplaces, we must urgently equip students and workers with the skills, knowledge, and competencies to harness AI responsibly and effectively. Our education system must adapt to prepare a workforce that can leverage AI to its full potential while safeguarding against its risks.

While AI tools can analyze information and enhance certain aspects of learning with unmatched efficiency, we must remember that education is ultimately a human endeavor. The true art of teaching involves wisdom, judgment and interpersonal skills that machines cannot replicate. As such, AI should never fully replace teachers, who nurture students’ critical thinking, values and character development.

Virginia is well-positioned for this new era. The most critical national security and military intelligence institutions in the United States are headquartered in Virginia and the Commonwealth’s colleges and universities lead the nation in technology research and development. These unique factors provide Virginia with a responsibility to spearhead a policy environment that strengthens trust, safety, and security in the development and deployment of AI technologies and the opportunity to assemble experts from the workplace and education to provide ongoing guidance and assistance in the responsible and effective implementation of AI in our education, training, and workplace learning.

Guidelines to Support the Responsible & Effective Implementation of AI Across Education in Virginia

These Guidelines for AI Integration through Education are comprised of the following three key components:

1) Guiding Principles
2) Strategies for Success
3) Roles and Responsibilities

1. Guiding Principles for the Use of AI in Education

- Do no harm: All integration of AI in education must be in accordance with the policy and IT standards that are set forth in the Executive Order and in other state and federal policies. This includes ensuring the safeguarding of the privacy, security, and confidentiality of personally identifiable information, ensuring that algorithms are not based on inherent biases that lead to discriminatory outcomes, and that AI is only allowed when its use has the potential to contribute positive good/improvement to the status quo.
• **Prioritize integrity**: A core purpose of education is the development of responsible, ethical, and engaged citizens. Therefore, part of the integration of AI in education must be to teach about morality, ethics, honor, cheating, and how artificial intelligence can lead to perverse and destructive outcomes for individuals, relationships, and communities.

• **Augment, not replace humans**: AI cannot and should not ever replace human judgement. Although synthesis and analysis of information can be expedited through AI, it will never replace teachers who provide wisdom, context, feedback, empathy, nurturing and humanity in ways that a machine cannot. It also should not overpower/over-ride the critical thinking, judgement, and morality of the learner.

• **Harness AI to empower student success**: AI presents transformative opportunities to enrich instruction and enable more adaptive, personalized learning. To fully leverage these benefits, we must embrace an outlook of innovation and experimentation, while ensuring access for all learners. Rather than just digitizing traditional practices, we can reimagine education to nurture each student’s unlimited potential with the assistive power of AI. Our vision should focus on possibility - AI as a gateway to expand human capacity - not conformity to conventions of the past.

• **Work in partnership**: AI researchers and experts in Virginia colleges and universities and employers are key partners and guides around building the skills and knowledge required to be successful in the new economy. This includes how to think about evolving AI systems and the practices needed to use them responsibly.

• **Be constantly discerning and responsive to the continuous expansion of AI capabilities and uses**: This is not a one-and-done. The guidelines, best practices, and tools available will constantly need to be revisited to keep pace with the changes brought by the exponential growth of AI and technology advancements in our world. Nimbleness and urgency, balanced with careful considerations, will be critical to ensuring we are as prepared for the continuous change ahead in education.

2. **Strategies for Successful Integration of AI in Education**

   At every level of education—from governing boards to individual classrooms—these strategies can improve the effective integration of AI into education.

   **Encourage Exploration** — To have informed discussions about integrating AI, educators first need hands-on experience to understand these technologies’ capabilities and limitations. School leaders should actively facilitate opportunities for teacher teams to directly explore various AI tools. Through guided firsthand usage, educators can discover potential applications to enrich instruction, as well as critical risks and challenges to consider. Rather than rely on rumors or superficial perceptions, we must empower teachers with deeper practical knowledge. By allocating time and resources for structured experimentation, schools can tap into educators’ insights to uncover creative use cases while proactively addressing ethical concerns. This ground-up understanding, straight from classroom trenches, will produce more thoughtful and responsible approaches to adopting AI.

   1. **Provide Professional Development** — As with any new tool or strategy, educators need professional development from experts in order to feel comfortable using it. Offering workshops or professional development courses, micro-credentials, or micro-badges on AI as well as meaningful follow-up implementation and application activities, discussions and opportunities to
collaborate with colleagues and experts who can help teachers understand and experience its capabilities and limitations. can help teachers understand and experience its capabilities and limitations.

2. **Spotlight Success** — Spotlight interesting examples of AI that are already being used in schools. Ensure educators have meaningful outlets to share what they are trying and whether it is working or not. Encourage teachers to collaborate in their exploration of AI to learn from each other’s experiences and builds a supportive community for this new educational environment.

3. **Host Stakeholder Conversations** — Host regular conversations with business leaders, educators, governing members, leaders, and families about AI and how schools are preparing or will be preparing students with the skills to thrive in an AI-infused world. Topics could include, but not limited to, fostering ethical AI use and digital citizenship collaboration and interdisciplinary learning, and integration of AI in the curriculum.

4. **Set The Right Conditions** — When it comes to using AI or any other technologies in school, it is important to establish conditions for effective use. Clearly outline the school or system’s policies and protocols around data privacy, honor code, student code of conduct, acceptable use, and ethical considerations when using AI, including those related to plagiarism and proper use of secondary sources. Teachers should know what is expected of them and the boundaries within which they should operate. These conditions might include using technology to support teaching and learning.¹

### 3. Roles & Responsibilities

Education stakeholders must understand and embrace their roles and responsibilities in an effort to integrate AI into our education institutions. This is an initial list of those roles and responsibilities which will continue to be refined by the Advisory Group.

- **State Education Agencies** – Virginia Department of Education (VDOE) and State Council of Higher Education for Virginia (SCHEV) (including Virginia Community College System)
- **Governing Boards/Leadership** – 131 K-12 school division boards of education and division leaderships and the boards of visitors/presidents/leadership teams at every public college and university
- **Higher Education Programs and Faculty/School & Classroom Leaders**
- **AI/Technology Directors**

**Specific Roles of State Agencies:** VDOE and SCHEV shall meet monthly with the SOE team to identify implementation hurdles, best practices, and areas of support needed from the field by the agencies to support implementation, accelerate what’s working well, and improve oversight of AI in education in the Commonwealth.

A. Each agency shall on an ongoing basis:

a. Create advisory resources, including policy and protocols best practices, for generative AI that are continuously updated and modified.

b. Create processes for tiers and rules at which approval is given for use of AI tools.

c. Develop stakeholder training toolkits and workshops for governing bodies, educators, families, and students on AI, its capabilities, and its limitations.

d. Spotlight success stories where AI is being used well in schools or higher education institutions. Serve as a resource bank of what is working and provide a supportive learning community for interested educators or leaders.

e. Host conversations with educators, institution leaders, and governing board members on how schools can best prepare students with the skills to thrive in an AI-infused world on topics such as fostering ethical AI use and digital citizenship; integration of AI in the curriculum; or establishing policy conditions for effective use.

f. Modify agency staffing structure to better provide expertise to the field, including on what AI tools are most applicable and encouraged to be used for K-12 or higher education institutions.

B. These agencies in partnership with the Virginia Community College System shall work in collaboration to design micro-badging and micro-credential training opportunities for the field to stay abreast of the latest AI technologies, ethics, and best governance leadership skills.

C. Ongoing Roles and Responsibilities:
   a. Capacity building/training at every agency and throughout the sector to the classroom level.
   b. Safeguarding privacy, security, and confidentiality of data.
   c. Strengthening governance of AI through supporting capacity building and technical assistance to the boards of visitors or school division governing boards.

Specific roles of Governing Boards/Leadership and Educators: Education happens at the local level. The role of informed and engaged governing bodies, active leaders and informed and empowered faculty and staff at the institution or school/division level will determine how well AI is integrated and used in education in Virginia. The following roles and responsibilities will help ensure the local implementation is constantly monitored, actively managed, and continuously adjusted to address the ongoing changes AI will bring to education. These are the critical but not comprehensive roles and responsibilities at the point of education delivery:

1. Establish a culture of integrity
   o Define what this culture looks like (State Agencies and Governing Boards)
   o Build a culture of integrity by discussing the honor code often with students and parents, implementing an honor code system with real consequences (Faculty/Staff)

2. Follow an Acceptable Use Policy inside and outside the classroom
   o Codify Acceptable Use Policy (State Agencies/Governing Boards)
   o Review and discuss the Acceptable Use Policy with students and parents (Faculty/Staff)
   o Implement and hold learning community accountable for living up to Acceptable Use Policy (Faculty/Staff)

3. Design assignments and assessments that encourage critical thinking and original thought and human judgement (Faculty/Staff)

---

2 Similar to Oregon’s Developing Policy and Protocols for the use of Generative AI in K-12 Classrooms resource or Generative Artificial Intelligence (AI) in K-12 Classrooms resource for K-12 and Higher Education.
4. Create opportunities for collaboration and peer review (Faculty/Staff)

5. Integrate digital citizenship with the following Standards of Learning strands (VDOE, Governing Boards, and Faculty/Staff)
   - Computer Science: The Impacts of Computing
   - Digital Learning Integration: Digital Citizen
   - English: Communication and Multimodal Literacies, Research
   - Fine Arts: Innovation in the Arts, History, Culture, and Citizenship
   - Health: Safety/Injury Prevention
   - Mathematics: Computation
   - Science: Scientific and Engineering Practices: Obtaining, evaluating, and communicating information
   - Social Studies and History: Skills
   - World Language: Interacting in School and Global Communities

6. Clarify expectations for use of AI in assignments (Governing Boards)

7. Communicate clearly and specifically when and how students can utilize Generative Artificial Intelligence in assignments (Faculty/Staff)

**Question(s):**

1. **Please provide comments or suggestions related to your knowledge of ODU**

**Responses: 8**

The BoV has made tremendous progress with the EVMS partnership! Truly remarkable!

The President and his staff do a great job of having presentations from various ODU communities to include faculty, staff, students and others.

President does an outstanding job keeping the board members informed.

Don’t feel like I get “briefed” enough between meetings; think we need more information than news clips.

Overall, I have been fortunate to be associated with ODU since I accomplished the challenge from then President Jim Koch of raising the $100,000.00 amount to the Fil-Am Tidewater Community for the establishment of the ODU Student Center in 1997. Since then I have served on the ODU Education Board of Trustees for 10 years and the ODU Research Foundation for nine years.

I feel we are well on our way towards accomplishing the Goals set by the Board.

Until I became a board member I was not informed as well as I thought. My time on the board has expanded my knowledge of ODU.

Now that we are merging EVMS it will be important to understand our economic impact to the community as a combined entity. Faculty engagement and needs is an ever-changing task. Understand the future of our Faculty and the changes that may occur would be interesting to discuss within the board meetings.

**Question(s):**

(1) Please provide comments or suggestions related to your fiduciary responsibilities

**Responses: 4**

As a board member I believe that we are well informed of the financial aspects of ODU. I look to be more informed in attending all meeting in the future.

I have a high level of respect for the team of financial professionals that serve ODU. President Hemphill has assembled a great staff that provides to BOV with all that we need to meet our fiduciary responsibility to the Commonwealth.

I feel I am well informed on all financial aspects of our business. Chad and his team are approachable and will provide good and bad news when needed. This transparency makes for a great team.

<td>I think continuous review and assessment of all committee agenda's should be on-going and revised annually. Committee meetings should be a glimpse into the good, the bad &amp; the ugly of an area. It seems to much time is spent on painting a &quot;perfect picture&quot;. Also, committee reports should be shorter in the full board meeting rather than lengthy descriptions of every detail discussed. It seems that generally committees should meet &amp; make decisions, synthesize their work/discussion and then present that to the board. I'm not sure I would change anything. By adding a committee last year I believe we are as efficient as we can be. I believe we can do more to understand what's on the minds of students, faculty, staff and alumni and then discuss in committees how to address identified needs. I can't think of anything that could make the presentations better.</td>

<td>The two day meetings make the committee meetings feel less rushed. Yes. The two day model allows for board members to attend committee meetings whether they are a member of the committee or not and this enables board members to be better informed. Yes time well spent. This model seems to work for those of us who live close by. Yes. The 2 day board meeting gives us the time we need to spend on the important issues we face as a board. Yes. Provides board members the opportunity to attend every committee meeting if they wish to know more. Also provides more time on Friday to dive deeper on strategic issues as we have done ref the ODU/EVMS merger. As I attend the various meeting’s I am impressed how informative the presentations are. I leave each time with a much better understanding of the topics presented. Yes. It is all that I have experienced. The two day meeting structure is working well, however I am disappointed that some members only attend their assigned committees.</td>

I think the 2 day board meetings have created more board members involvement and cross pollenation, where board members may not sit in on other meeting in the past.

Yes. Good to split up all the committee meetings. It makes for a more condensed 2 days.

<td>This is my 8th year so I am timed out. I have greatly enjoyed being a member of the board and feel I have added to the board. I am very grateful that we hired a new president and he has turned out to be the best person for the job. I think there are challenges yet to deal with but feel confident that the school will progress in the right direction...</td>

<tr>

<td>Again, I believe it is ok in committees to discuss things in greater detail- including subjects that might not be positive but don't need to be voted on or discussed in the general meeting. And in the full board meeting, we don't need to know every detail of every committee.</td>
</tr>
<tr>
<td></td>
<td>Have each board member attend all the committee meetings.</td>
</tr>
<tr>
<td></td>
<td>I have noticed that there are some who miss meetings regularly. if you accept the position as a board member you need to attend each meeting if not then one should resign to allow someone else to have the opportunity to serve and make a difference. It would be nice to have a policy where a member is required to step down if they don’t attend meetings and contribute.</td>

<tr>

<td>I did like the tours of projects that we were funding and perhaps the committees could after their meeting go on to learn more about the subject of that committee instead of have 3 or 4 hours between meetings.</td>
