Setting Up Microsoft Edge

Microsoft’s Chromium Edge Browser is installed on all ODU-managed Windows computers, offering the benefits of a Microsoft-supported browser with the same parts under the hood as Google Chrome and fully integrated bookmarks and settings that sync to your ODU cloud profile.

Set up Microsoft Edge

1. Launch the new Microsoft Edge browser, either from your Windows Task Bar or your Desktop:

   ![Microsoft Edge](image)

2. On the first launch, Edge will attempt to connect to your ODU account.
3. Once your account has connected, click the **Complete setup** button to make a few settings selections.

4. Decide on the theme you'd like your browser to use, and click **Confirm**.
5. Confirm that your settings and bookmarks sync to your ODU cloud profile. Make sure the slider is set to **Yes**, and click the **Confirm** button.

6. You are ready to go. Click the **Get Started** button.

7. Whenever you use the Edge browser on any other ODU computer, you’ll have access to all of your bookmarks, extensions and settings.
Import bookmarks
If you are switching to Edge from Firefox, Chrome or Internet Explorer, you can import all of your bookmarks or favorites so they sync to your ODU cloud profile. Learn more.
